

## **DSI Achieves Cisco Master Networking Specialization**

**01/16/19 Ashburn, VA:** DISYS Solutions Inc. (DSI), a Cisco Gold Certified Partner, recently achieved the newest of Cisco’s specializations – Master Networking. This makes DSI only the second Cisco Channel Partner in the Americas to hold this specialization.

“The Master Networking Specialization assures customers that DSI is among Cisco’s most elite partners, with the greatest expertise in architectures that organizations need to support digital transformation,” said Alan Bechara, Sr. Vice President of Sales and Marketing. “As an early adopter of this technology, DSI recognizes the trend toward digital readiness and software defined networking. We are excited to bring this innovation to our customer base!”

Gold Certified  
Master Specialized in Collaboration  
Master Specialized in Networking  
Master Specialized in Security

Master Specializations are Cisco’s highest and most exclusive level of partner certification, attesting that DSI has made significant investments of time and resources to obtain expertise in the subject technologies and solutions. To receive the Cisco Master Networking Specialization, DSI passed a rigorous review of its architecture and solutions delivery capabilities that support Cisco’s intent-based networking solutions, as well as an audit of related business processes and results.

“DSI is constantly striving to be the best in our field, offering the highest level of solutions and services to our customers, with the certifications to back it up,” said Chris Eubanks, Program & Partner Alliance Manager. “We are proud to add Master Networking to our growing list of specializations, and we are currently preparing for the process to add the Master of Data Center and Hybrid Cloud Specialization.”

In addition to Master Networking, DSI holds Master Specializations in Collaboration and Security, and Advanced Specializations in Collaboration Architecture, Data Center Architecture, Enterprise Networks Architecture, Security Architecture, Core and WAN, Internet of Things - Connected Safety and Security, Service Provider Optical Technology, Unified Access, Unified Computing Technology, and Unified Fabric Technology. DSI is also a Master Cloud and Managed Service Provider.

DSI certifications include Cisco Certified Internetwork Experts (CCIE) and Solutions Specialists. DSI is proud to employ many team members with these certifications, especially since CCIE is the highest technical certification offered by Cisco, with holders representing less than 3% of all certified Cisco professionals and less than 1% of networking professionals worldwide.

**About DSI:** DSI provides complete IT solutions and services that are secure, innovative, energy efficient, and cost effective. Our customers include State & Local Government and Education (SLED), Federal agencies, and commercial companies. We hold nationwide term contracts that are supported by a team of industry professionals and certified engineers. We put the customer first and understand the importance of providing a valuable experience from start to finish. Our knowledge of current and emerging technologies is the foundation for providing solutions and services that increase productivity and create positive workflow for our customers. DSI is headquartered in Ashburn, Virginia, with offices nationwide. We are a Minority-Owned Small Business founded in 1991 by the current owners. Learn more at [dsitech.com](https://dsitech.com).
