

Smart, connected buildings for education and government

At DSI, we can help you take advantage of smart building technology to create intuitive, trusted facilities – empowering you to lower costs, create efficiencies, invest in the future, and improve the lives of employees, students, citizens, and everyone you serve.

Have you ever truly considered the possibilities?

Smart buildings aren't just for big corporations or new construction. There are elements that can be added to your existing facilities to help you address some of the biggest challenges you're facing, including:

- ✓ Addressing changing health and safety concerns
- ✓ Providing safe physical and remote access to facilities
- ✓ Lowering utility, energy, and staffing costs
- ✓ Handling equipment monitoring and maintenance
- ✓ Modernizing student, citizen, and employee experiences
- ✓ Reducing your overall carbon footprint

And these are just scratching the surface!

When it comes to smart building technology, the possibilities are almost endless – and we'd like you to know that plenty of them are attainable and can fit into even the tightest of budgets.

Together with Cisco, we can help you bring those possibilities to life

At DSI, we have the solutions, partnerships, and expertise needed to make your vision for smart, connected buildings a reality – and it all starts with creating a strong security & network foundation.

1 We'll help you put security front and center

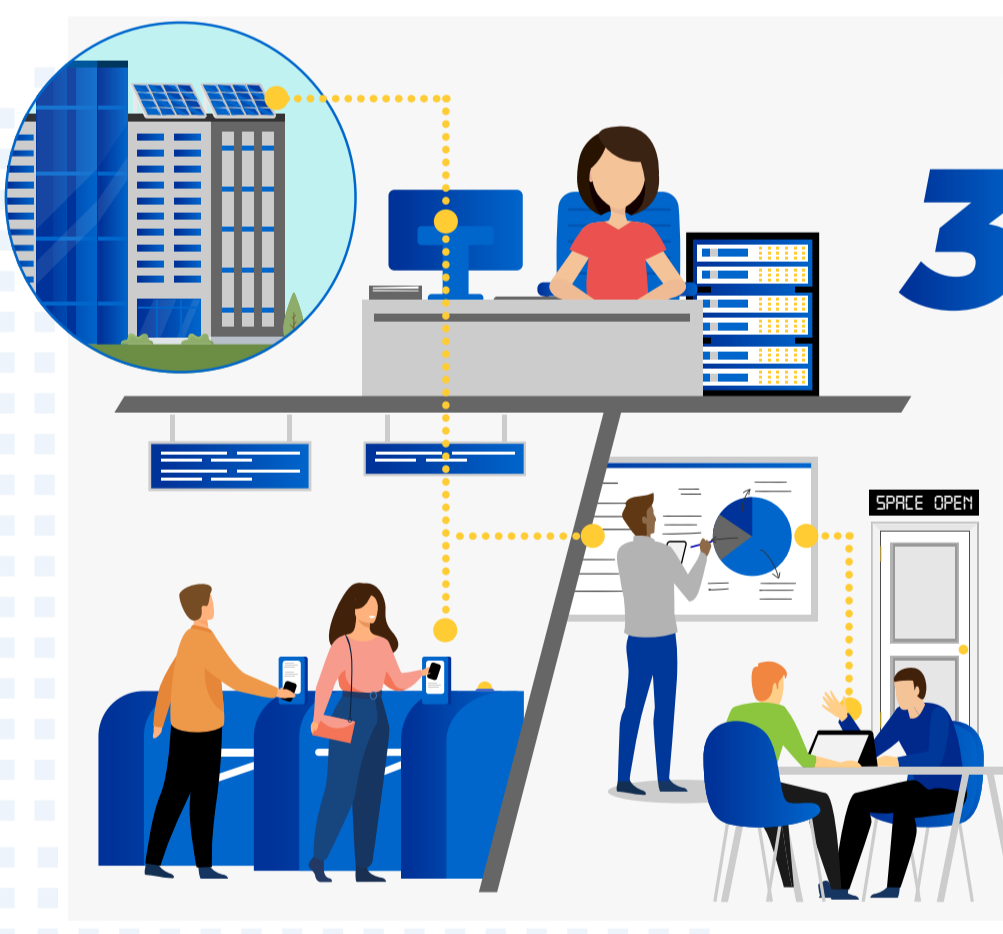

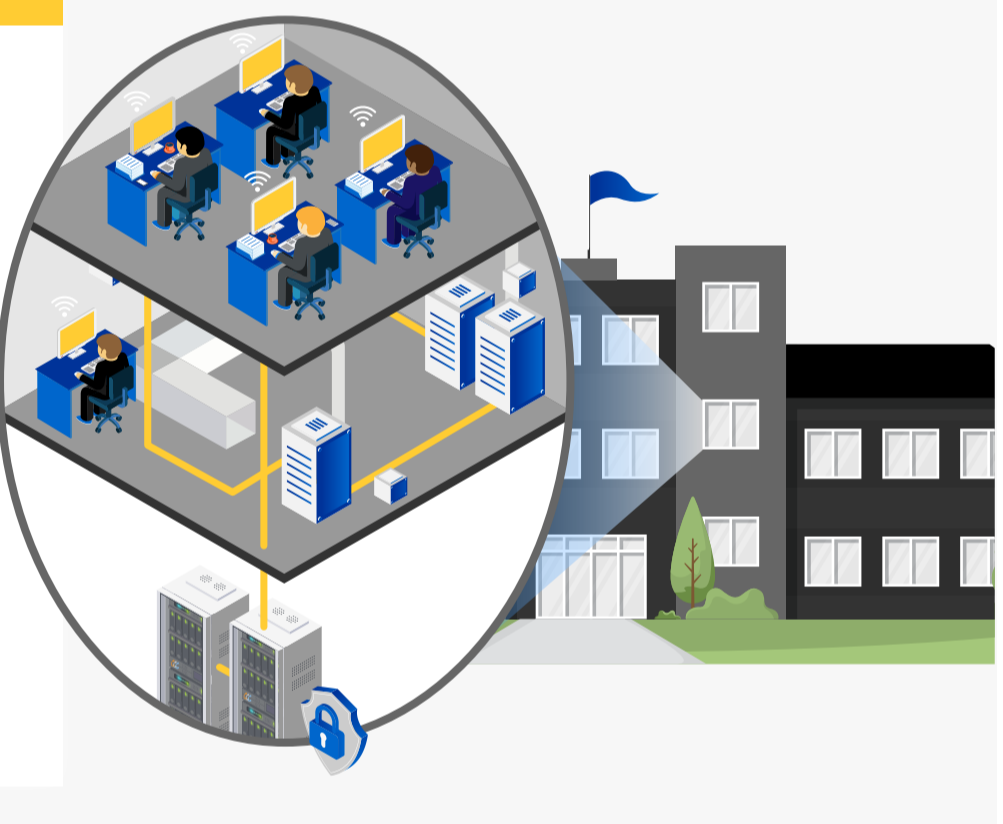

Security is one of our core competencies, and we'll ensure it is woven into everything you do in your smart buildings by helping you to:

- Develop an overarching security plan
- Involve key stakeholders early in the process
- Architect, deploy, and support the technology you need
- Gain an integrated view into smart building security

2 We'll ensure you have the right network foundation

Our experts will work with you to leverage your existing investments and Cisco's intent-based networking solutions to build an IoT-ready network with:

- Wireless access points
- Core and edge switches
- Core and edge routers
- Centralized management

3 We'll help you deploy the right endpoints, systems, and sensors

Smart building solutions aren't "out of the box" products. But with our expertise, we can make it seem like they are across a variety of use cases, including:

- Building and people safety
- Air quality monitoring
- HVAC management
- Lighting management
- Predictive maintenance
- Smart elevators, parking, and warehouses
- Occupancy and space usage

The value of a partner like DSI

When you work with us, you get a true partner who knows your industry and how IoT, networking, and security can all work together for you.

A stellar track record

We're easy to do business with and have a long list of excellent customer references.

Comprehensive capabilities

In addition to smart building technology, we can support all of your other IT needs.

We know your industry

We're experienced in the private and public sector – including education and government.

Amazing customer experiences

We're a customer centric organization and can be your partner for all-things IT.

Cisco Gold Partner

We're IoT Authorized with Master Specializations in Collaboration, Networking, and Security.
