

Let DSI Tech help you improve, simplify, and unify your approach to cybersecurity.

We're living in a time where it's only getting harder for schools, businesses, and government agencies to keep their critical assets as protected as they need to be. If cybersecurity is a concern or on-going challenge within your organization, it's time to do something about it – and DSI Tech can help.

So, what's holding you back?

Your challenges may not be the same as other organizations. But when it comes to cybersecurity, these are the ones we continue to hear from our customers in both the private and public sectors.

Can you relate to any of them?

- X Staying on top of constantly evolving threats
- X Lacking visibility into what happens on our network
- X Navigating thousands of daily security alerts
- X Trying to keep our outdated network secure
- X Protecting our remote teams & users
- X Having budget/staff to do everything we want to
- X Using security tools that are too complex to manage
- X Educating our staff and users on best practices
- X Trying to keep our outdated network secure

At DSI Tech, we can help you overcome challenges like these with proven security technology that's not only affordable, but also incredibly easy to use, manage, and scale.

Together with Cisco, we make it easier to stay secure & compliant

With Cisco's simple but effective security products, we'll help you build a unified security infrastructure that makes it easier to protect your users, devices, data, and anything else that's important to your organization.

Cisco SecureX is a built-in platform that connects your infrastructure to their security products for more visibility and simplicity.

Cisco's security products & services are:

Designed to work together for better protection

Cloud-powered for easy use & management

Proven to work with your other IT investments

Trusted to make working from home more secure

Cisco Secure Portfolio

Cisco's integrated solutions can fill any security gaps you may have:

- ✓ Network security & access
- ✓ Email & web security
- ✓ User & device protection
- ✓ Application security

DSI Managed Security Services

DSI Tech can provide all advice and support you need along the way:

- ✓ Security assessments
- ✓ Design & deployment services
- ✓ 24x7 US-based monitoring
- ✓ Onsite incident remediation
