

Let DSI help you improve, simplify, and unify your approach to cybersecurity

We're living in a time where it's only getting harder for schools, businesses, and government agencies to keep their critical assets as protected as they need to be. If cybersecurity is a concern or on-going challenge within your organization, it's time to do something about it – **and DSI can help.**

So, what's holding you back?

Your challenges may not be the same as other organizations. But when it comes to cybersecurity, these are the ones we continue to hear from our customers in both the private and public sector. Can you relate to any of them?

- ✗ Staying on top of constantly evolving threats
- ✗ Lacking visibility into what happens on our network
- ✗ Navigating thousands of daily security alerts
- ✗ Protecting our remote teams and users
- ✗ Having budget/staff to do everything we want to
- ✗ Using security tools that are too complex to manage
- ✗ Educating our staff and users on best practices
- ✗ Trying to keep our outdated network secure

At DSI, we can help you overcome challenges like these with proven security technology that's not only affordable, but also incredibly easy to use, manage, and scale.

Together with Cisco, we make it easier to stay secure and compliant

With Cisco's simple but effective security products, we'll help you build a unified security infrastructure that makes it easier to protect your users, devices, data, and anything else that's important to your organization.

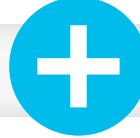

Cisco SecureX is a built-in platform that connects your infrastructure to their security products for more visibility and simplicity.

Cisco Secure Portfolio

Cisco's integrated solutions can fill any of the security gaps you may have:

- Network security and access
- Email and web security
- User and device protection
- Application security
- Security visibility and reporting

DSI Managed Security Services

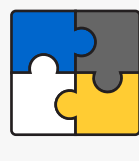

And, DSI can provide all the advice and support that you need along the way:

- Security assessments
- Design and deployment services
- 24x7 US-based monitoring
- Onsite incident remediation

Cisco's security products and services are:

Designed to work together for better protection

Proven to work with your other IT investments
