Issue #03   **March 30, 2020**

This is a special edition of Tech Topics that focuses on Cisco Collaboration & Security tools that can help you telework safely during this difficult time. We wanted to make sure you knew about **Cisco's free Webex collaboration offerings** that allow employees to stay connected to their teams and continue business operations. Cisco broadened the offer to include security by providing **extended free licenses and expanded usage counts at no extra charge for AnyConnect Secure Mobility Client, Duo Security, and Umbrella Security**.

These offers will be available from now until July 1, 2020. Supporting our customers remains a top priority, and we hope these proactive steps help companies manage business impact and keep employees safe during this evolving situation.

Contact DSI for more information about how to get started with a free Webex trial & security offerings: 571-707-3636 or sales@dsitech.com.

In This Issue:

Webex Collaboration • Cisco Security • Collaboration Devices for Telework

Webex Collaboration

Learn and work remotely while staying connected. Cisco is offering unlimited usage on the most secure collaboration platform to help you get through this challenging time.

Webex Meetings

Offers face-to-face video conferencing, screen sharing, webinars & event hosting, and online learning.

Webex Teams

Builds collaboration with the ability to switch devices seamlessly. Start or join meetings with the touch of a button and keep the conversation going with individual or group messaging. Easily share files and screens with your team. White board or draw on your device for interactivity.

Integration: Webex plays well with others and fully supports third-party applications such as Box, Google Calendar, Google Drive, Salesforce, Trello, Twitter, Zendesk, and many more.

Support: Efficient customer service with remote desktop control and live chat.

Security:

- Your messages, files, and whiteboard drawings are fully encrypted, right from your device to your recipients' devices.
- For added control, customers can manage their own encryption keys on premises.
- Administrators can manage corporate or personal devices with controls such as PIN lock and the ability to wipe data if a device is lost.
- Users can keep teamwork private by locking spaces so only moderators can add others.
- Webex Teams integrates with Data Loss Prevention (DLP) tools including Cisco Cloudlock, to protect sensitive information even when users are working with others outside their company, or even block users from sharing files, to maintain company data policies.

Cisco Security

Cisco is providing extended free licenses and expanded usage counts at no extra charge for three key security technologies designed to protect remote workers anywhere, anytime, and on any device.

AnyConnect Secure Mobility

Empowers employees to work from anywhere on company laptops or personal mobile devices. It also provides the visibility and control security teams need to identify who and which devices are accessing their infrastructure. Existing AnyConnect customers can exceed their user limit to support an increase in remote workers, and new customers can access a free license. [Learn More about AnyConnect]
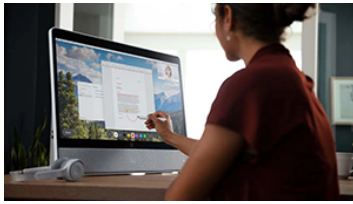

Duo Security

Enables organizations to verify users' identities and establish device trust before granting access to applications. By employing a zero-trust model, it decreases the attack surface and reduces risk. With this offer, existing customers can exceed their user limit to support an increase in remote workers, and new customers can access a free license. [Learn More about Duo]

Umbrella Security

Protects users from malicious Internet destinations whether they are on or off the network. Because it is delivered from the cloud, Umbrella makes it easy to protect users everywhere in minutes. With this offer, existing customers can exceed their user limit to support an increase in remote workers, and new customers can access a free license. [Learn More about Umbrella]

Collaboration Devices for Telework

Webex Desk Devices

Simple-to-use and compact video conferencing devices designed for desktops. Enjoy all-in-one HD video and voice, with unified communications features. With the Cisco Webex Room OS, you can whiteboard and annotate shared content with the touchscreen. [More Info]

Headsets

Whether at a desk or on the go, everyone must remain connected and focused on work. That's why Cisco extended the collaboration platform with a range of professional headsets that create intuitive user experiences and offer a single, integrated tool to manage Cisco headsets, endpoints, and applications, both on-premises or in the cloud. [More Info]

IP Phones

User-friendly, full-featured IP phones to meet the needs of your entire organization. Many older IP phone models are not able to keep up with security and compliance standards. However, the latest Cisco IP phones reduce regulatory compliance risks and provide the latest technology with the option to be on-premises or cloud. [More Info]

Hardware as a Service

Get the latest technology and increase collaboration adoption with a simple, affordable subscription. Enjoy low monthly payments for Cisco devices including IP phones, Webex desktop and room devices, and

Webex Board. Device support is included in the plan. Subscribe for 3 years and at the end of the agreement you can auto-renew for another year or refresh and upgrade your devices with a new 3-year agreement, without the price spikes you would get with a capital purchase. Contact DSI for details about product plans and pricing. [More Info]

DSI provides complete IT solutions and services that are secure, innovative, energy efficient, and cost effective. Our customers include State & Local Government and Education (SLED), Federal agencies, and commercial companies. We hold nationwide contracts that are supported by a team of industry professionals and certified engineers. Learn more at dsitech.com.
