Issue #14

February 25, 2021

In This Issue:

[Security Threat Defense](#) • [Webex Calling](#) • [Cellular Gateways](#)

[New Specialization](#) • [Join the DSI Team](#)

Security Threat Defense

What happened with the SolarWinds breach? What did DSI do to stop the threat? (Hint: it involves Cisco AMP, Sophos, and DSI Managed Services!). [Check out this handout](#) for details and contact DSI to find out more about our [Managed Security](#) offering!

[Tell me more about Threat Defense](#)

Webex Calling

[Cisco Webex Calling](#) is a cloud-based phone system that is optimized for businesses. It has all the essential business calling capabilities you are likely to need, providing simpler, intuitive communication with phones for every user & office location, comprehensive PBX capabilities, enhanced experience for

mobile devices, security & encryption from end to end, easy cloud management, and flexible calling-plan options. No need to worry anymore about the expense and complexity of managing a phone system infrastructure on your premises; Cisco takes care of the Webex Cloud so that you can focus on what matters most.

[Watch this short video](#) for more info and [reach out to DSI anytime](#) to speak with one of our experts!

Cisco Catalyst Cellular Gateways

Deliver secure, scalable cellular deployments from any location using your existing infrastructure for primary or failover connectivity. The [Catalyst Cellular Gateways](#) deliver 5G wireless WAN with multi-gigabit-class access, Cisco SD-WAN management, and high availability. They combine the latest in cellular technology with deployment flexibility, investment protection, and ease of management, with both traditional and SD-WAN deployments.

High speed and resiliency

Multigigabit, sub-6GHz connectivity allows for high-density connectivity and massive scale IoT and wireless WAN networks.

Flexible, scalable deployment

Connect using existing infrastructure, from wherever cellular reception is strongest.

Simplified, centralized management

Zero-touch provisioning and a single interface mean easy, remote management.

Secure by design

Dying gasp recovery and a Trustworthy Solutions design creates a secure WWAN solution.

[Learn more about Catalyst Gateways](#)

The DSI Team recently earned Cisco's **Advanced Service Provider Architecture Specialization!** This is a great addition to our current Architecture Specializations in Collaboration, Data Center, Enterprise Networks, and Security.
