### In This Issue:

[Simplify Cybersecurity](#) • [Data Center Modernization](#) • [5G or WiFi6?](#) • [Join the DSI Team](#)

## Simplify & Unify Your Cybersecurity

We're living in a time where it's only getting harder for schools, businesses, and government agencies to keep their critical assets as protected as they need to be. If cybersecurity is a concern or on-going challenge within your organization, it's time to do something about it – **and DSI can help!**

**So, what's holding you back?**

Your challenges may not be the same as other organizations. But when it comes to cybersecurity, these are the ones we continue to hear from our customers in both the private and public sector. Can you relate to any of them?

- X Staying on top of constantly evolving threats
- X Lacking visibility into what happens on our network
- X Navigating thousands of daily security alerts

# Data Center Modernization

## Why modernize?

Today, applications are your business. They drive improved customer engagement, operational efficiency, competitiveness, and new revenue streams. Applications are also becoming more virtualized, microservice-based, and hyper-distributed across on-prem, multicloud, and edge infrastructure. Achieving the critical reliability, availability, and predictable performance you need requires a modern, end-to-end infrastructure – one that is self-monitoring, self-analyzing, and self-optimizing.

## What's required?

Digital and IT transformation demand that enterprises modernize their compute infrastructure to achieve unprecedented levels of performance, flexibility, scale, and intelligence. You need:

- Programmable, software-defined infrastructure
- Analytics-enabled continuous optimization
- Hybrid cloud and edge-enabled
- Pervasive security
- Management and operations on a global scale

## 5G or Wi-Fi 6? Yes.

**Wireless-first? Yes. Cloud-driven? Yes. Data-optimized? Yes. And it's only from Cisco.**

Wi-Fi 6 is ready to power entirely new mobile experiences today, offering faster speeds for immersive-experience applications and more device and IoT capacity for high-density environments such as university lecture halls, malls, stadiums, and manufacturing facilities.

### Reliability

Provides a consistent, dependable network connection for a seamless experience.

### Capacity

Transmits more data to more clients than previous Wi-Fi standards, including IoT.

### Bandwidth

Achieves speeds up to four times faster than 802.11ac to drive more applications.

### Enhanced features

Improves battery efficiency in smartphones, tablets, and IoT devices. Better Wi-Fi coverage and support for 2.4GHz make Wi-Fi 6 ideal for IoT devices..

Cisco DNA software subscriptions provide analytics and assurance powered by AI/ML, for easy troubleshooting and management of your wireless network. Leveraging Wi-Fi 6 access points as gateways, you can rapidly deploy IoT applications at scale with the indoor IoT services in Cisco DNA Spaces.

## Join the DSI Team!

DSI is committed to employee satisfaction through our benefits program and a friendly, team-based culture. We provide a positive environment for you to grow, learn, and excel as an industry professional. If you are looking for an exciting place to work that challenges your abilities and is financially solid and growing every year, then this is the place for you!

The DSI team is growing! [Current job openings & career paths](#) include Accounting, Engineering (Data Center, Security, Wireless), Sales (Federal & SLED in various locations), and Purchasing/Warehouse.

[Join our team!](#)

[Visit the Tech Topics Newsletter Archives Webpage](#)

DSI provides complete IT solutions and services that are secure, innovative, energy efficient, and cost effective. Our customers include State & Local Government and Education (SLED), Federal agencies, and commercial companies. We hold nationwide contracts that are supported by a team of industry professionals and certified engineers. Learn more at [dsitech.com](https://dsitech.com).
