Expanded Meraki IoT & WAN for Hybrid Workforce

Cisco Meraki's expanded technology lineup addresses hybrid workforce requirements and the evolving needs of enterprises to protect people, places, and things. Meraki product teams have been hard at work to help strengthen the SASE solution and fill in gaps among the MX product line. In addition, they enhanced MG cellular gateways, added MV camera sizes and features, and broadened MT sensing capabilities.

Check out new additions to the Meraki family:

MX75, MX85, MX95, MX105, vMX Private Cloud:

Gigabit speeds (branch & midsize campus), SFP WAN & LAN port options, multi-WAN ready for improved carrier diversity & increased data capacity, and SDWAN enabled SASE ready via Cisco Umbrella. [[Data Sheet](#)]

MG41/E: Dual SIM capability with automatic failover support, CAT18 integrated cellular up to 1.2Gbps throughput, and IP67 rated. [[Data Sheet](#)]

MV2: Cloud storage native (5 days onboard), flexible mounting options, mobile onboarding experience, built-in analytics, and low cost. [[Data Sheet](#)]

MT11: Two probe sensor options (bare-metal probe and glycol-encased probe) for cold storage/refrigeration environments and leverage existing MR/MV gateways devices for seamless connectivity. [[Data Sheet](#)]

For details about the Meraki IoT & WAN expanded product lines for Hybrid Workforce:

Return to Work
It's time to switch to simplicity

Watch Video

The video thumbnail features a large blue play button in the center. The background is white with green icons of a city skyline, a lightning bolt, and a gear. The text 'Return to Work' and 'It's time to switch to simplicity' is at the top. A blue bar at the bottom contains the text 'Watch Video'.

Experiences Are Everything

A guide to enabling the workplace and the workforce of the future

Read Guide

The guide thumbnail features a woman in a black turtleneck holding a tablet. The background is white with green and blue geometric shapes. The text 'Experiences Are Everything' and 'A guide to enabling the workplace and the workforce of the future' is on the left. A blue bar at the bottom contains the text 'Read Guide'.

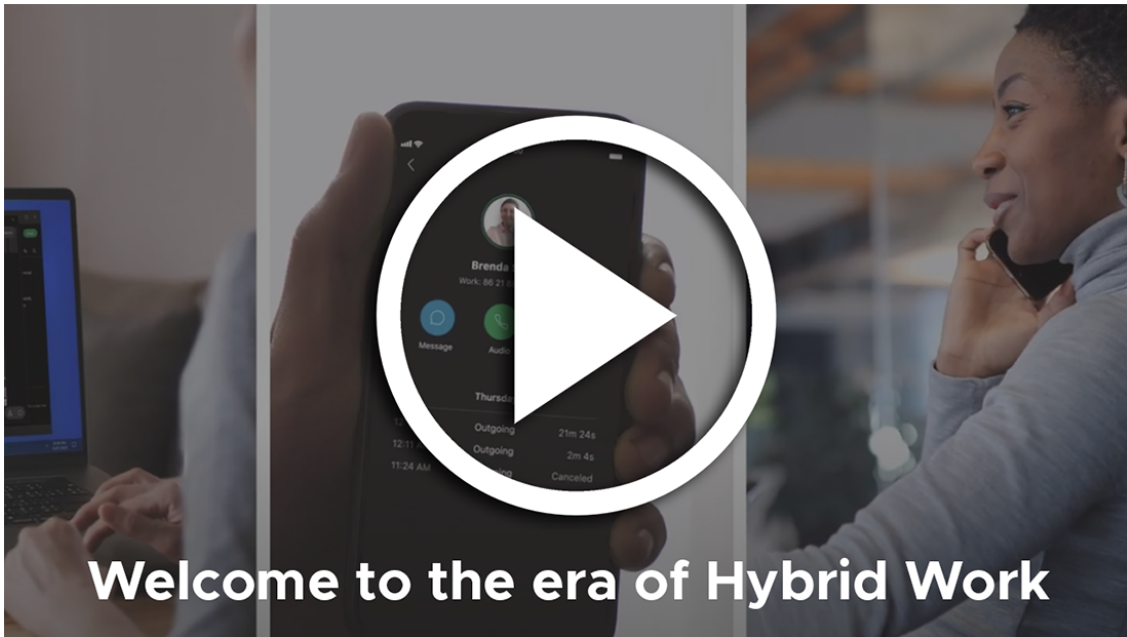

New Webex Suite

The all-new Webex Suite brings together calling, meeting, messaging, polling/Q&A, and events to address your most pressing concerns and to help you become successful as the world shifts to hybrid work. Cisco also updated the Webex brand to represent their commitment to leading the new era of hybrid work and “to power an inclusive future for all”.

Highlights include:

- **Slido polling and Q&A capability** is now natively integrated into Webex to create a more engaging meeting experience, at no additional cost.
- **Custom layouts** already give users lots of flexibility. Now as a host or co-host, you can curate your audience’s view and limit participants’ view to “stage only”, so everyone sees what’s on stage and limit visual distractions from other participants or panelists.
- **Meeting host controls** prevent unwanted participant video from becoming a distraction in your meeting. Hosts and co-hosts will have more moderation control to mute or turn-off individual participant’s video.
- **Revamped Webex Events** with enhanced webcast and webinar modes create even more engaging and interactive event experiences for your audiences at scale.
- **Coming Soon:** Background voice removal. Have loud co-workers at home or in the office that create distractions for your meetings? Select “My Voice Only” and Webex smart audio will focus on just your speech, removing background noise and any background talkers.
