Remote Access VPN Guidance from NSA & CISA

The National Security Agency (NSA) and the Cybersecurity and Infrastructure Security Agency (CISA) released a joint Cybersecurity Information Sheet detailing factors to consider when choosing a Virtual Private Network (VPN) and top configurations for deploying it securely.

“[Selecting and Hardening Remote Access VPN Solutions](#)” will also help leaders in the Department of Defense, National Security Systems, and the Defense Industrial Base better understand the risks associated with VPNs.

Protect Your Network with MFA

To prepare for Cybersecurity Awareness Month (October), we wanted to start off with something you've probably heard about and might already use in various instances. We're talking about **Multi-Factor Authentication (MFA)** and Two-Factor Authentication (2FA). This article dives into the importance of MFA and how to set up Cisco Duo in a few simple steps.

So, if you're interested in protecting your network device logins, then please continue reading!

Smarter & Safer Ways to Work Anywhere

Supporting our customers with **secure remote work options** remains a top priority for DSI. We understand that many of you are figuring out hybrid solutions in addition to improving your current telework situation. [Contact DSI anytime](#) to learn more about collaboration products (like Cisco Webex Suite)

and security solutions (like the Cisco SecureX platform) to help you stay safely connected from anywhere.

DSI CISCO Partner
Smarter & Safer Ways to Work Anywhere

▶▶▶ Collaboration Tools
