New DNA Center Virtual Appliance

Virtualization technology has changed the world of IT and enabled cloud computing. It has also been embraced by Cisco customers due to its flexibility and cost benefits. That demand is behind the recent announcement at *Cisco Live* of the DNA Center Virtual Appliance, which gives customers new deployment options for network controller, whether deployed within the company data center or in public and private clouds.

"Cisco" gear bought from certain companies could be counterfeit. Business entities in Florida and New Jersey, plus 25 storefronts on Amazon and eBay, sold old Cisco gear that had been cosmetically altered to seem like new, more advanced models, as part of a conspiracy going back eight years and taking in more than $100 million in revenue. [Read More]

The Federal Trade Commission (FTC) announced a change that the Safeguards Rule, designed to protect customer financial data, would be expanded to include non-financial institutions like auto dealerships. They must comply with several new rules to protect consumer information, and one of the few security technologies that is specifically called out is Multi-Factor Authentication (MFA). [Read More]

HP Enterprise (HPE) is the first major server vendor to ship servers with the Arm-based processor. Starting in Q3 2022, HPE says it will ship ProLiant RL300 Gen11 servers, available for both outright purchase and for leasing through HPE's GreenLake consumption model. This will be the first in a series of HPE ProLiant RL Gen11 servers using 80-core Altra and 128-core Altra Max processors. [Read More]
