Issue #34

October 27, 2022

### In This Issue:

[Microsoft Cisco Partnership](#) • [Internet Health Check](#) • [Meraki Updates](#) • [Updated iPad Wi-Fi Specs](#) • [Join Our Team](#)

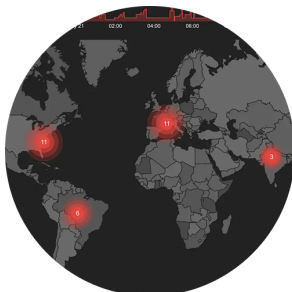

## New Microsoft & Cisco Partnership

A new partnership brings Microsoft Teams to Cisco Meeting Room devices! In the first half of 2023, Cisco and Microsoft will offer the ability to run Microsoft Teams natively on Cisco Room and Desk devices Certified for Microsoft Teams, with the option of Teams as the default experience. Cisco will become a partner in the Certified for Microsoft Teams program for the first time.

## Internet Health Check

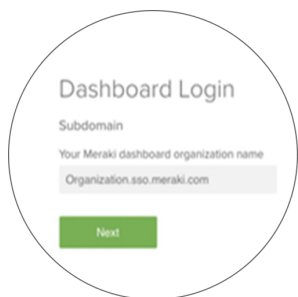

Cisco's ThousandEyes, which tracks internet and cloud traffic, provides weekly updates on the performance of three categories of service provider: ISP, cloud provider, and UCaaS. ThousandEyes is monitoring how providers are handling the performance challenges they face and they do a weekly roundup of interesting events in the delivery of these services, with a summary provided by Network World.

## Meraki Updates

### SP-Initiated SAML SSO

Meraki's SP-Initiated SAML Single Sign On (SSO) is now available for all customers on the Early Access page in the dashboard! This is a fully cross-compatible upgrade to existing Meraki dashboard SSO that allows customers to now use two different types of SAML SSO for the dashboard to best fit their deployment.

### License Move in Co-termination

Public License Move in co-termination is now available and accessible via the Early Access Page. There are many scenarios that may require the transfer of a license from one Meraki dashboard organization to another. Previously, moving license keys between organizations could only be performed by a member of the Meraki Support team, but now this feature is available on the dashboard and APIs to Meraki customers using the co-termination model.

## Updated iPad Wi-Fi Specs

Apple devices integrate hardware, software, apps, and services to let you manage your deployment projects easily by using Apple School Manager or Apple Business Manager. One important update for platform deployment includes Wi-Fi specifications for the iPad in the categories of 802.11 compatibility & frequency band, physical layer (PHY) data rate, channel bandwidth, MCS index, and Spatial streams/SISO/MIMO.
