Cisco Live! Melbourne Recap

At this event in Melbourne, Australia, Cisco highlighted its latest innovations and positive impact on the planet by going all in on security, sustainability, and simplicity. This includes security in a complex & multi-cloud world, domain monitoring to full-stack observability, blazing-fast & simple infrastructure, and powering an inclusive future for all.

[Dive Deeper](#)

Economic Impact Study

Cisco commissioned Forrester Consulting to perform an unbiased cost-benefit analysis of Cisco Secure Endpoint to measure its operational efficiency and threat efficacy over a 3-year period. Based on a

composite organization comprised of interviewees with experience using Secure Endpoint, benefits include:

- Return on investment of 287%
- Improvements to security workflows of 50%, valued at \$1.7 million
- Payback in less than 6 months
- Total benefits of \$2.25 million

Updates & Resources

[AirOS 8.10MR8 Escalation Special](#) resolves two main bugs. Consider upgrading if you are affected.

- [CSCwd37092](#) Slow TCP downloads, failing EAP-TLS in 8.10.181.0/17.3.6 - 2800/3800/4800/1562/6300 series
- [CSCwc78435](#) 9130 sending incorrect channel list on out of band DFS event causing client connectivity issues

Update to [Meraki MS 15.18](#) for quality improvements and new features! This update brings powerful network security and analytics capabilities, streamlined policy management, and enhanced PoE features.

With [this support update](#) for Terminal Doppler Weather Radar channels, you can now select channels 116-132 for manual channel assignment or include channels 116-132 in radio profiles for automatic assignment on specific access points.

The job of a network engineer just keeps getting more complicated and mission critical applications are competing for bandwidth. Thankfully, there are many great (and free!) tools available to help them complete never-ending tasks. [[Free Tools](#)]
