5G News

Cisco and T-Mobile announced plans to offer businesses Cisco Meraki's first-ever 5G cellular gateways for fixed wireless access (FWA), the MG51 and MG51E. Thanks to this solution, businesses of all sizes will be able to create enriching and differentiated experiences for their customers using simplified, scalable, and reliable network managed services powered by T-Mobile's 5G network and the cloud-first Cisco Meraki platform. [[Read More](#)]

Cisco and its longtime partner, global IT solution provider NTT, said they will co-innovate to further **private 5G adoption for enterprise customers** and bridge the gap between operational technology and IT environments. The collaboration will bring together Cisco's private 5G technology with NTT's managed

services so that enterprises can integrate private cellular into their existing LAN and WAN infrastructure without compromising security. [\[Read More\]](#)

Growing Interest in SD-WAN & SASE

Global network service providers are responding to clients' transformational WAN requirements to support greater agility and reliability for digital business initiatives. Gartner has observed modest changes in enterprise networking requirements and buying criteria for global networks in the past 12 months, including a growing interest in services like managed SD-WAN and SASE transforming the enterprise networking market. These are additional ways, rapidly deployed, that organizations can help improve the agility of providers' network solutions and differentiate themselves to the enterprise audience.

Palo Alto Bolsters AI Support

Palo Alto Networks has added a variety of new features to its SASE and SD-WAN packages to help enterprises streamline network operations and better secure distributed WAN resources. The updates center around new automation capabilities in Palo Alto's Prisma SASE, IoT support for its Prisma SD-WAN, and a new connector for its zero-trust offering. New to the Prisma SASE bundle are increased AI capabilities as part of

Palo Alto's autonomous digital experience management (ADEM) monitoring and management system.

Aruba Prioritizes Key Technologies

HPE Aruba Networks plans to prioritize development of a short list of key networking technologies in 2023 including data center switching, private 5G, and secure access service edge (SASE), which are top of mind for enterprise customers. The acquisition of Athonet will help Aruba expand its private 5G network options. They also made a significant move to boost SASE offerings by buying Axis Security and its security service edge (SSE) platform, a security technology that they'll use to bolster their own SD-WAN and SASE offerings.
