RSA Conference 2023 Highlights

[RSA Conference](#), the world's leading cybersecurity conference and exposition, held its 32nd annual event in San Francisco with the theme "Stronger Together", attracting over 40,000 attendees. Highlights included:

- **33 keynote presentations** on two stages that featured sponsor keynotes, panels, esteemed guest speakers, and in-depth sessions from industry experts on a range of topics.
- **650+ speakers** across **350+ sessions** and nearly **550 exhibitors** on the expo floors.
- **Key session and seminar presentations on various topics** including "Security as Part of Responsible AI: At Home or At Odds?", "The Cryptographers' Panel", "Five Most Dangerous New Attach Techniques", and "Hugh Thompson Show: Quantum Edition".
- **HiddenLayer was named "RSA Conference 2023's Most Innovative Startup"** by the judges' panel comprised of technology, venture, and security industry thought leaders.

- The **Award for Excellence in the Field of Mathematics** was presented to Paul Kocher, renowned cryptographer and independent researcher.
- There were **four closed door programs for select executive and government audiences**: RSAC CISO Boot Camp, International Cybersecurity Forum (ICSF), Executive Security Action Forum (ESAF) and eFraud Global Forum (eFG).

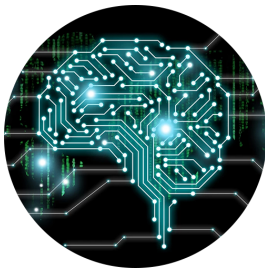

Cisco revealed at RSAC 2023 that it's launching a new extended detection and response (XDR) platform that's been built from the ground up and goes beyond the prior XDR capabilities that have been available in the tech giant's SecureX offering.

The new Cisco XDR platform fuses network detection and response (NDR) and endpoint detection and response (EDR), providing cross-domain telemetry in a way that no one else in the market is doing. The offering also stands out from security information and event management (SIEM) products by being near real-time when it comes to delivering threat detection and prioritization. [[Read More](#)]

HPE Simplifies IT Operations with AIOps-Driven Capabilities

HPE introduced product innovations to help enterprise IT teams simplify network management processes and improve operational agility with the next generation of HPE Aruba Networking Central, a cloud-native network management solution. The platform has been re-designed to simplify operations and improve productivity by leveraging artificial intelligence for IT operations (AIOps) to reduce manual tasks, so stretched networking teams can focus on more strategic and higher-value projects.

HPE Aruba Networking also announced Network-as-a-service (NaaS) capabilities for customers and channel partners to acquire, deploy, and manage on the GreenLake platform with a monthly subscription.

Cisco Live takes place June 4-8 in Las Vegas! It's the place to meet, greet, learn, and share ways of solving some of the biggest challenges out there. It delivers education and inspiration to technology innovators worldwide through large-scale in-person and digital events, as well as on-demand education. It is the premier destination for Cisco customers and partners to gain knowledge and to build community, either virtually or in-person.
