Attacker & Scammer Warnings

FBI & CISA Release Advisory on Scattered Spider Group

The FBI and the Cybersecurity and Infrastructure Security Agency (CISA) released a joint Cybersecurity Advisory on Scattered Spider - a cybercriminal group targeting commercial facilities sectors and subsectors. The advisory provides tactics, techniques, and procedures (TTPs) obtained through FBI investigations as recently as November 2023. Scattered Spider threat actors typically engage in data theft for extortion using multiple social engineering techniques and have recently leveraged BlackCat/ALPHV ransomware alongside their usual TTPs.

Scammers Target Popular Online Game

Roblox is free to play but contains an in-application currency called Robux that can be used to make purchases for a user's avatar, some of which exist in limited quantities and can be worth tens of thousands of real-world dollars. Roblox users can be targeted by scammers who attempt to steal valuable items or Robux from other players. Attackers are using JavaScript URLs, API forms, and more to scam users in this popular online game.

Cisco AI Readiness Report

The Cisco AI Readiness Index investigates AI readiness across six key pillars - Strategy, Infrastructure, Data, Governance, Talent, and Culture and categorizes organizational readiness into four levels – Pacesetters (fully prepared), Chasers (moderately prepared), Followers (limited preparedness), and Laggards (unprepared). The Index is based on a double-blind survey of 8,161 senior business leaders at organizations with 500 or more employees with responsibility for AI integration and deployment within their organizations.

Wi-Fi 7: Advanced Connectivity for the Next Generation

As use cases that provide immersive experiences, collaboration, and superior reliability quickly become mainstays in home and enterprise environments, Wi-Fi 7's sophisticated feature set will bring the required level of advanced performance these applications demand. Unique and exciting features of Wi-Fi 7 include 320 MHz channels, 4K QAM, and Multi-Link Operation (MLO).

Microsoft Ignite 2023

“Microsoft Ignite” is the flagship event for IT developers and business decision makers, where people learn about new products & updates and hear from senior leaders & subject matter experts about what’s on the horizon. The overarching theme for this year’s event was how they are working to empower customers, partners, and developers to thrive in the era of AI. Other highlights included Microsoft x NVIDIA, foundation models and tooling, data, and Microsoft Teams.
