

The Challenge

The world you know is changing. The cloud is your new data center, the internet is your new network, and Software-as-a-Service (SaaS) is your new application stack. While these solutions deliver the flexibility and agility the modern enterprise craves, the resulting ecosystem of external dependencies and third-party services creates significant operational blind spots for IT.

Impact of Insufficient Cloud Visibility

1,295 Average number of cloud services used by an enterprise¹

78% Organizations planning to host more than 40% of their workload in the cloud²

\$4.45M Average cost of a data breach³

The Solution

You need monitoring and visibility that go beyond narrowly focused network and application performance management capabilities to deliver digital experiences in today's dynamic world.

Cisco ThousandEyes provides digital experience monitoring that empowers you to monitor and manage all the cloud-based and internet-centric environments that your customers and employees depend on.

How ThousandEyes Works

IN THREE EASY STEPS

- 1 ThousandEyes collects billions of performance measurements from pre-deployed global vantage points in the cloud and across the internet, as well as from vantage points with your enterprise WAN and end-user devices.
- 2 They correlate this data from every user to every application to every network dependency to accelerate insights useful for IT operations.
- 3 Operations and application teams can use ThousandEyes actionable intelligence to produce faster issue resolution internally or externally with service providers.

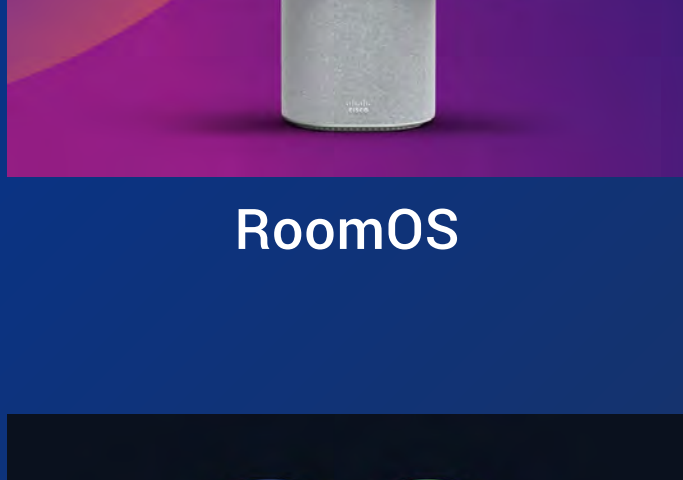

Cisco Integrations

AppDynamics

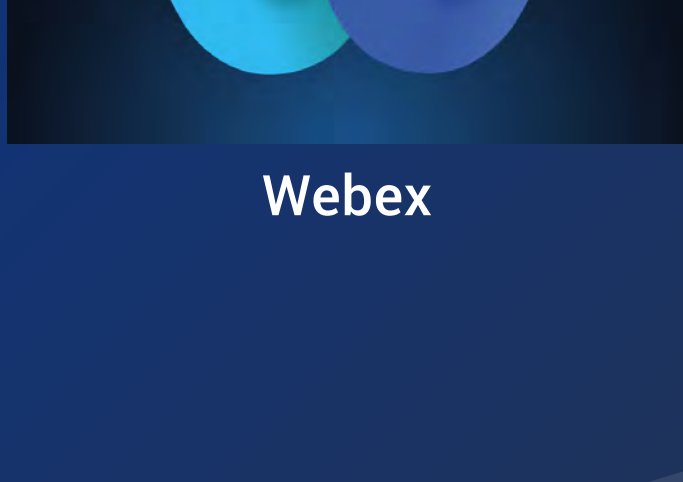

Catalyst 9000

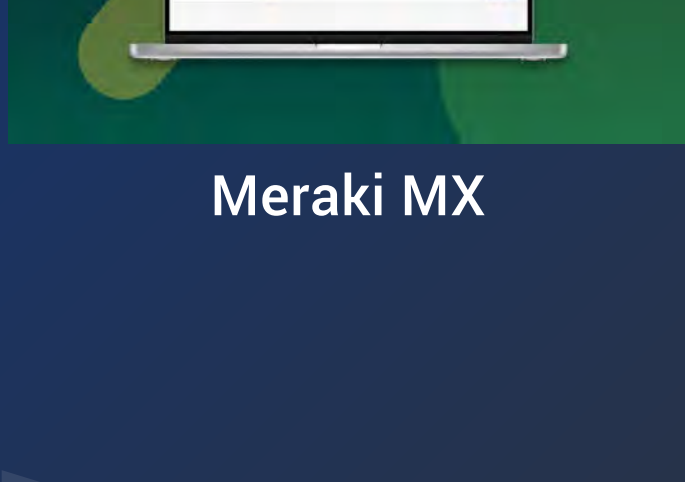

RoomOS

SD-WAN & Secure Access

Webex

Meraki MX

DSI Tech Solutions, Services, and Customer Success

There's value in our partnership

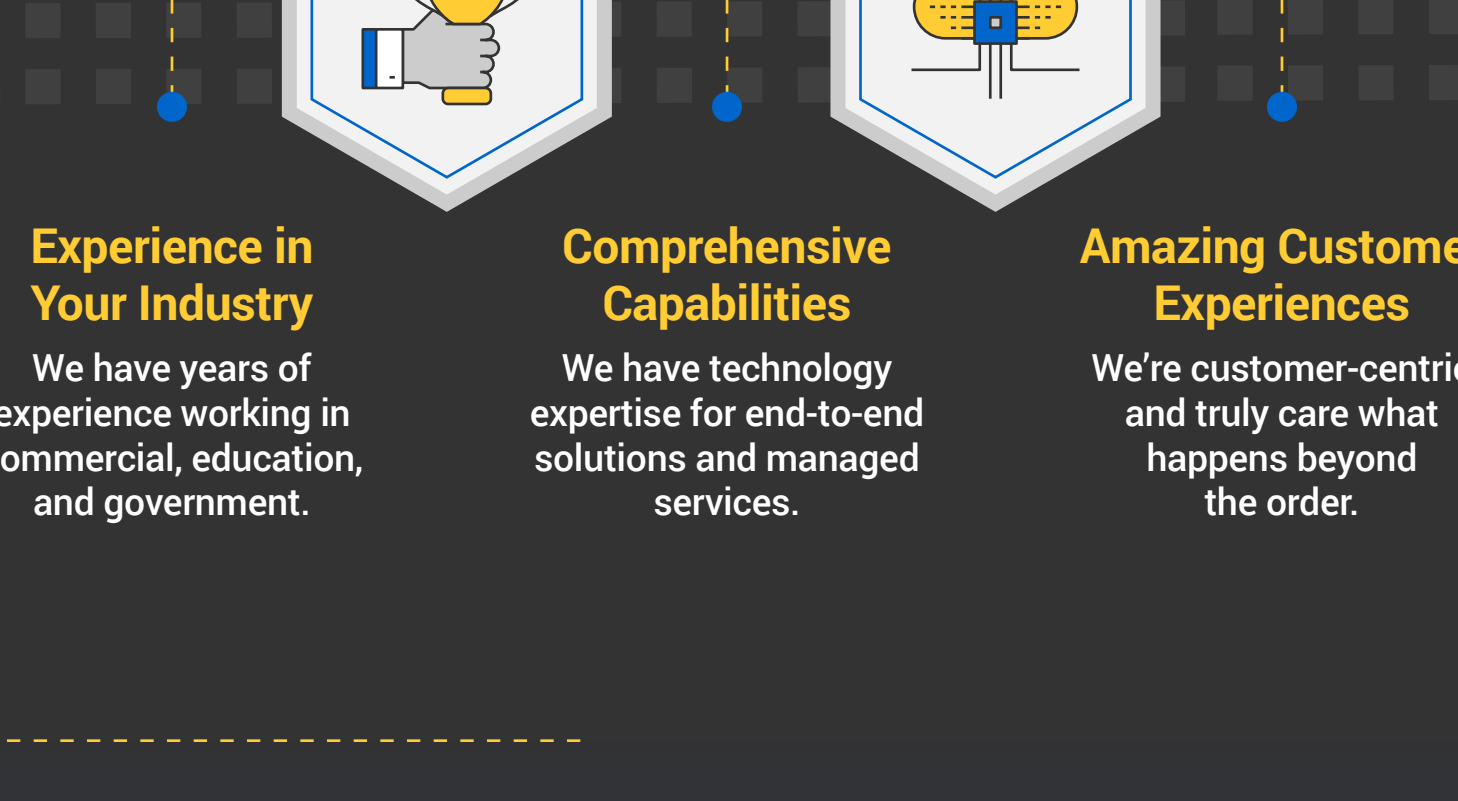

When you work with us, you'll get a true partner that knows IT, security, collaboration, hybrid work, and your industry.

Stellar Track Record

We're easy to do business with and have a long list of excellent customer references.

Expertise

Our teams are highly certified in products and solution architectures that support your project.

Experience in Your Industry

We have years of experience working in commercial, education, and government.

Comprehensive Capabilities

We have technology expertise for end-to-end solutions and managed services.

Amazing Customer Experiences

We're customer-centric and truly care what happens beyond the order.
