

Managed Security Services

Trusted Managed Security Services Provider (MSSP)

Why Managed Security?

- ✓ You don't have the time and/or qualified staff to monitor security events 24x7x365
- ✓ You aren't effectively using existing solutions after deployment
- ✓ You want log aggregation & integration for different security products
- ✓ You have budget constraints for maintaining personnel and/or SOC
- ✓ You want predictable pricing and ability to plan for future IT investments

Managed Security revolves around the following three core services:

What We Do:

- Multiple Tier detection with 24x7x365 Security Operations Center (SOC)
- Monitor all network traffic for anomalies & threats through onsite sensors & Cisco ISE
- Aggregate logs from endpoints, cloud, security devices into SIEM
- Integrate endpoint protection platforms like Cisco AMP & Umbrella

What You Get:

- External threat intelligence
- Continuous network visibility at an affordable rate
- Single view for multiple security solutions with extended log storage
- Experienced personnel to help with triage and remediation

What We Do:

- Managed Next-Gen Firewall located at customer network
- Perform firmware and version updates
- Monitor network, intrusion, malware events
- Alert and investigate high severity events
- Make policy and rule changes (optional)

What You Get:

- Continuous monitoring of network edge threats
- Fine-tuned intrusion prevention that provides optimum performance
- Regular patching to prevent vulnerability exploits
- Network visibility, malware, & threat reports

What We Do:

- Managed endpoint security with Cisco AMP, Umbrella, Threat Response
- Enable managed secure access and MFA using Cisco Duo
- Investigate endpoint threats across security platforms
- Perform policy changes to endpoint security solutions (optional)

What You Get:

- Automated protection, containment, remediation of advanced attacks
- Continuous monitoring endpoint & DNS threats with SOC
- Advanced investigation and correlation with Firewall and SIEM
- Monthly/quarterly endpoint & access reports

Certification

DSI Tech is a Trusted Managed Security Services Provider (MSSP); Cisco Preferred Partner for Cloud & AI Infrastructure, Networking, Security, and Services; and a Duo Managed Services Provider. These demonstrate an elite level of expertise to sell and deliver managed security services.

ISO certification ensures client satisfaction by providing the highest quality products that meet client requirements and the International Standard Quality Management System.

DSI Tech employs a team of highly trained and certified network security engineers, including:

Cisco Certified Internetwork Engineers specialized in Service Provider & Security

Cisco VIP Security Engineers

Certified Information Systems Security Professionals

ICSI Certified Network Security Specialists

Capability & Credibility

- ✓ Decades of experience, technical knowledge, organizational structure & processes, and financial depth.
- ✓ Financially stable and growing; providing transparent payment schedules and costs.
- ✓ High level partner statuses with top vendors.
- ✓ Recipient of multiple awards including Cisco Partner of the Year.
- ✓ Term contracts with Federal and State & Local Government and Education (SLED) customers.

Customer Service

DSI Tech puts the customer first and understands the importance of providing a valuable experience from start to finish. We aim to provide the highest level of customer service with quick response times, various support options, cost-effective solutions & services, and quality vendor partnerships.
